Full Environmental Assessment Form
Supplement to Part 3 - Evaluation of the Magnitude and Importance of Project Impacts and Determination of Significance

POSITIVE DECLARATION
Pilgrim Pipeline
September 14, 2016

Pilgrim Transportation of New York, Inc. (Pilgrim) submitted a preliminary Draft Environmental Impact Statement (DEIS) with their application to the New York State Thruway Authority (NYSTA) for an Occupancy Permit in August 2015. Pursuant to 6 NYCRR §617.6, Pilgrim subsequently submitted Part 1 of the Full Environmental Assessment Form (EAF), which the New York State Department of Environmental Conservation (NYSDEC) and the NYSTA, as co-lead agencies, used together with the preliminary DEIS to complete parts 2 and 3 of the Full EAF and make a determination of environmental significance pursuant to 6 NYCRR §617.7.

When completing Part 2 of the EAF, the co-lead agencies (LAs) identified potential project impacts and characterized each impact as a small impact or a moderate to large impact. Then, in completing Part 3 of the EAF, the LAs evaluated the magnitude, duration, likelihood and importance of the project’s potential impacts.

The following is a description of the proposed action and a list of impacts that the LAs have determined to have a potentially significant impact on the environment.

Description of Proposed Action:

The application submitted by Pilgrim to the NYSTA seeks an unprecedented use of New York highway ROW to transport crude oil and refined petroleum products, in addition to proposing an extensive longitudinal occupancy of approximately 90 miles of the New York State Thruway.

The proposed action includes the construction of 2 new, buried, parallel pipelines (mainline pipelines) from Albany, New York to Linden, New Jersey; it would traverse the counties of Albany, Rensselaer, Greene, Ulster, Orange and Rockland Counties in New York State. One of the mainline pipelines would carry crude oil southbound from Albany and the second parallel mainline would carry refined petroleum products (gasoline, diesel, heating oil, and kerosene) northbound from Linden.

Pilgrim states that each mainline pipeline would be approximately 169.89 miles long, each having 116.4 miles in New York State. Approximately 79 percent of the mainline pipelines in New York would be installed within the New York State Thruway (NYS Thruway) right-of-way (ROW); 7.5 percent would be co-located with other roads, utilities
or railroads; and the remaining 13.5 percent would be newly acquired ROW. The mainline pipelines would each be up to 20 inches in diameter and would be capable of transporting the equivalent of 200,000 barrels of oil per day. In addition to the mainline pipelines, five single pipe product lateral pipelines would be constructed in New York to intermediate delivery points (existing terminals), and four pump stations and 10 meter stations would also be constructed.

In New York State, the proposed action would disturb approximately 1,360 acres (1,250 acres for mainline pipelines, laterals, ancillary stations and temporary pipeyards and approximately 110 acres for access roads), including 296 acres that will be permanently maintained as ROW. The proposed action would cross 257 streams and waterbodies (232 along mainline pipelines and 25 along laterals), including the Hudson River and multiple major and minor tributaries of the Hudson. There are also 296 (9.2 linear miles) crossings of wetlands; including 25 crossings of NYSDEC protected freshwater wetlands (approximately 19 along mainline pipelines and 6 along laterals).

**Identification of Impacts**

Based upon a review of the application submitted by Pilgrim, the LAs have determined that there is a potential for multiple significant adverse environmental impacts from the construction, operation and maintenance of the pipeline including the following:

1) Impacts on Land

The proposed action entails construction on steep slopes, exposed bedrock, and on land where the depth to water table is less than 3 feet. The proposed action will also involve a significant physical disturbance of more than 1,360 acres of land. As a result, the proposed pipeline construction would likely result in increased erosion of soils which may contain pollutants that could be discharged to waterbodies and significantly impact water quality and aquatic species habitat (e.g. spawning, propagation, and survival).

2) Impacts on Geological Features

The NYS Unique Geologic Landforms project has identified unique geological features along the proposed pipeline route. The proposed action may result in the modification or destruction of unique geological features which could have a significant adverse impact on these features.

3) Impacts on Surface Water

The proposed action will traverse surface water at 257 locations, including two crossings of the Hudson River, and more than 9.2 linear miles of wetlands which would temporarily impact more than 80 acres of wetlands, including 25 freshwater wetlands under the jurisdiction of NYSDEC. The proposed project has the potential to impact water quality standards at these crossings and wetlands, including significant increases in turbidity. Construction and operations within and adjacent to surface waterbodies and
wetlands and hydrostatic testing of pipeline sections, as well as temporary and long term maintenance roads, may cause erosion and water quality related impacts. The potential for extensive lateral and vertical movements of streams over the proposed years of operation could result in additional impacts from pipe exposure and subsequent corrective actions which could impact the stability and ecology of the streams. Additional long term impacts from ROW maintenance and vegetation management activities may also occur.

4) Impacts on Groundwater

The proposed action involves the conveyance of petroleum products across several groundwater and drinking water resources including the Ramapo River Basin Aquifer Systems Sole Source Aquifer, and the crossing of two New York City public water supply system aqueducts, the Catskill Aqueduct and the Delaware Aqueduct. The proposed action increases the potential for contamination of unconfined aquifers and shallow groundwater areas if surface spills of hazardous materials occur during construction, operation or maintenance of the project ROW.

5) Impacts on Flooding

The proposed action traverses several floodplains and floodways along the proposed route. While the installation of the pipelines would result in temporary impacts to floodplains and floodways, there are several above ground structures that would be located within 100-year floodplains including pump stations, meter stations and access roads that could result in the increased potential for future flooding impacts.

6) Impacts on Air

The proposed action has the potential to result in direct and indirect air quality impacts, including the generation of fugitive dust during construction and emissions from construction equipment. Moreover, the electricity used to power pump stations has the potential to result in additional air quality impacts.

The proposed action has the potential to exacerbate climate change due to emissions of greenhouse gas. This includes, but not limited to, fugitive emissions and leakage from the operation of the pipelines and emissions from construction and maintenance activities. The proposed action could also have potential impacts associated with lifecycle greenhouse gas emissions.

7) Impacts on Plants and Animals

Several federally and state listed threatened and endangered species and their habitats are located along the proposed pipeline route and may be indirectly or directly impacted by the proposed action. Additionally, the proposed action involves the removal or destruction of large quantities of vegetation or fauna, including approximately 611 acres of forest that would be impacted, 132 acres of which would be permanently converted to
non-forested, maintained pipeline ROW which has the potential to increase surface
water runoff and erosion, among other things.

8) Impacts on Agricultural Resources

The proposed action traverses more than 20 acres of agricultural land including
approximately 5.82 miles of prime farmland and 7.63 miles of farmland of statewide
importance. During construction, there may be significant impacts from the disruption of
crop production compaction as well as potential loss of crop land along the permanently
maintained portions of the ROW.

9) Impacts on Aesthetic Resources

The proposed action passes through or is in close proximity to at least eight public
carks, including the Sterling Forest State Park and Schunnemunk Mountain State Park
and two privately owned golf courses. Additionally, the clearing of new ROW within
existing forested areas may be visible from several scenic vistas and important areas.

10) Impacts on Historic and Archeological Resources

The proposed action will cross 45 archeological resources and three properties listed on
the National Register of Historic Places, and may have a potentially significant impact
on these properties. In addition, the proposed project may transect and disturb Native
American archeological sites belonging to the Delaware Tribe of Indians, Delaware
Nation, Stockbridge-Munsee Band, and the St. Regis Mohawk Tribe.

11) Impacts on Open Space and Recreation

The proposed action may result in a loss of recreational opportunities or a reduction of
an open space resource within local communities. As mentioned previously, the
pipelines will traverse several public parks and may result in short term impacts during
construction and potentially long term impacts associated with the operational and
maintenance needs for the pipelines.

12) Impacts on Critical Environmental Areas

The proposed action is located within 670 feet of a designated Critical Environmental
Area (CEA), namely the Chadwick Lake Reservoir CEA. More information is needed to
determine if the proposed action will result in a significant adverse impact to the
environmental characteristics of the CEA.

13) Impacts on Transportation

The unprecedented use of the NYS Thruway ROW for a crude oil pipeline has the
potential to significantly impact the traveling public and commerce that this important
transportation corridor services. The proposed action could disrupt a major
transportation corridor that spans from Albany County to Rockland County and result in a substantial and possibly permanent change in the use, or intensity of use, of land including Thruway Authority property and NYS Thruway ROW for construction and long-term operations and maintenance of the pipelines. Additionally, traffic impacts may occur associated with construction and operation of the pipelines, including blasting and possible spill response. The potential transportation impacts implicate the consistency of the proposed action with applicable State and federal laws and policies regulating highway use. A spill from the pipeline could also disrupt a major transportation corridor and divert a large volume of traffic to local and county roads. Such disruptions have the potential to significantly impact safety, commerce, emergency services, and the mobility of the traveling public including on the Thruway, which has an average annual daily traffic number of more than 40,000 vehicles for this section.

The proposed action may alter the present pattern of movement of goods by transporting crude oil to refineries in New Jersey via pipeline as opposed to barge down the Hudson River and may impact how crude oil is transported through New York State.

14) Impacts on Energy

The proposed action may utilize more than 2,500 Mwh per year of electricity to run the pump stations.

15) Impacts on Noise, Odor, and Light

The proposed action may result in construction related traffic and noise impacts during the duration of the proposed action, which is estimated at 10 months, and will include the blasting of bedrock along the NYS Thruway ROW.

16) Impacts on Human Health

The proposed action potentially risks creating a hazard to human health and the environment in the event of a pipeline rupture, possibly due to malfunction, natural disaster or security breach. The longitudinal occupation of the NYS Thruway ROW for more than 90 miles by an oil pipeline carrying a flammable gases or liquids under pressure within limited access highway ROW has the potential to adversely affect the safety and security of the traveling public.

In addition, excavation and disturbance associated with construction may occur within contaminated soils and prior remediation sites, including the BASF manufacturing facility which has soil and groundwater contamination concerns and 10 other potential sites of concern for soil contamination. Importantly, the proposed action may result in potential adverse impacts to and within nine potential Environmental Justice (EJ) areas that the proposed construction, operation and maintenance of the mainline pipelines will traverse, including an EJ community near the Port of Albany where the pipeline is proposed to originate.
17) Consistency with Community Plans

The proposed action may result in the creation of a material conflict with the current plans or goals as officially approved or adopted of the 29 municipalities traversed by the proposed action and may be inconsistent with those officially adopted community plans.

18) Consistency with Community Character

The proposed action may interfere with the use or enjoyment of officially recognized or designated public resources, including several public parks and recreational areas that are located along the pipeline route. Additionally, there may be areas where the clearing of forested area for a maintained ROW is in stark contrast to the character of the existing landscape.

19.) Cumulative Impacts

The installation of a pipeline that spans nearly 170 miles in New York State and New Jersey; occupies more than 90 miles of the New York State Thruway; traverses dozens of communities; and disrupts approximately 9.2 linear miles of wetlands and 257 surface waterbodies along the entire route; can result in extensive impacts to water quality and natural resources. A cumulative assessment of impacts is necessary to determine whether the proposed action can designed and constructed in a manner to avoid, minimize or mitigate potential impacts.

In addition, the proposed longitudinal occupation of the pipeline within the Thruway corridor has the potential to interfere with the future growth and expansion of the Thruway. The current ROW may not be sufficient to accommodate both longitudinal utilities and necessary future improvements of the highway infrastructure including work to bridges, culverts, and future expansions.

20.) Coastal Consistency

As part of the EIS process, the LAs will also need to consider if the proposed action is consistent with State Coastal Policies that promote the beneficial use of coastal resources, prevent their impairment, and evaluate major activities that substantially affect numerous resources. As a first step, the LAs have completed a Coastal Assessment Form (CAF) and will forward this form to the New York State Department of State (DOS) and the three Local Waterfront Revitalization Programs (LWRPs) that will be traversed by the proposed action including the City of Albany, City of Rensselaer and City of Newburgh. The DOS is responsible for administering the New York State Coastal Management Program and any federal coastal consistency determination. The Department and NYSTA are responsible for determining whether the proposed action is consistent with State coastal polices. The following State coastal polices may be applicable to the proposed action and will be considered in more detail: significant fish and wildlife habitats (19 NYCRR 600.5(b), flooding and erosion (19 NYCRR 600.5(g)), general policy for major actions in coastal areas (19 NYCRR 600.5(i)) historic and
cultural resources (19 NYCRR 600.5(i)), scenic areas (19 NYCRR 600.5(d)), agricultural lands (19 NCYRR 600.5(c)), water (19 NYCRR 600.5(h)).

**Statement of Significance**

As demonstrated in this document, the proposed action may result in one or more significant adverse impacts to the environment, and therefore an EIS must be prepared. Accordingly, the LAs hereby issue this Positive Declaration, which has been prepared in accordance with Article 8 of the Environmental Conservation Law. The LAs will be conducting public scoping, which will include a public comment period. Pilgrim is responsible for preparing a draft scope and the LAs will announce a public review of the draft scope in the Department's Environmental Notice Bulletin (http://www.dec.ny.gov/enb/enb.html). Following the public comment period on the draft scope, the LAs will prepare a final scope pursuant to which Pilgrim will develop the DEIS. The LAs will publish the availability of the DEIS for public comment in the Environmental Notice Bulletin.
Instructions for Completing Part 1

Part 1 is to be completed by the applicant or project sponsor. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification.

Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either “Yes” or “No”. If the answer to the initial question is “Yes”, complete the sub-questions that follow. If the answer to the initial question is “No”, proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the project sponsor to verify that the information contained in Part 1 is accurate and complete.

### C. Planning and Zoning

#### C.1. Planning and zoning actions.

Will administrative or legislative adoption, or amendment of a plan, local law, ordinance, rule or regulation be the only approval(s) which must be granted to enable the proposed action to proceed?  
- If Yes, complete sections C, F and G.  
- If No, proceed to question C.2 and complete all remaining sections and questions in Part I

#### C.2. Adopted land use plans.

a. Do any municipally-adopted (city, town, village or county) comprehensive land use plan(s) include the site where the proposed action would be located?  
Varies, see DEIS Section 3.2.2.3  
If Yes, does the comprehensive plan include specific recommendations for the site where the proposed action would be located?  
☐ Yes ☐ No

b. Is the site of the proposed action within any local or regional special planning district (for example: Greenway Brownfield Opportunity Area (BOA); designated State or Federal heritage area; watershed management plan; or other?)  
If Yes, identify the plan(s):  
See DEIS, discussed throughout

| Yes ☐ No

c. Is the proposed action located wholly or partially within an area listed in an adopted municipal open space plan, or an adopted municipal farmland protection plan?  
If Yes, identify the plan(s):  
Varies, see DEIS Section 3.2.2

---

Page 2 of 13
C.3. Zoning

a. Is the site of the proposed action located in a municipality with an adopted zoning law or ordinance? [ ] Yes [ ] No
   Varies, see DEIS Section 3.2.2.3

b. Is the use permitted or allowed by a special or conditional use permit? [ ] Yes [ ] No
   Varies

c. Is a zoning change requested as part of the proposed action? [ ] Yes [ ] No
   i. What is the proposed new zoning for the site?

C.4. Existing community services.

a. In what school district is the project site located? See Table ES-1 for list of jurisdictions

b. What police or other public protection forces serve the project site? See DEIS Section 3.2.3

c. Which fire protection and emergency medical services serve the project site? See DEIS Section 3.2.3

d. What parks serve the project site? See DEIS Section 3.2.2.5

D. Project Details

D.1. Proposed and Potential Development

a. What is the general nature of the proposed action (e.g., residential, industrial, commercial, recreational; if mixed, include all components)?
   Transportation of energy products

b. a. Total acreage of the site of the proposed action? acres
   b. Total acreage to be physically disturbed? acres
   c. Total acreage (project site and any contiguous properties) owned or controlled by the applicant or project sponsor? acres

   See Section 2.2.1-4, and Table 2.2-3

c. Is the proposed action an expansion of an existing project or use? [ ] Yes [ ] No
   i. If Yes, what is the approximate percentage of the proposed expansion and identify the units (e.g., acres, miles, housing units, square feet)? % Unidades:

   d. Is the proposed action a subdivision, or does it include a subdivision? [ ] Yes [ ] No
   i. Purpose or type of subdivision? (e.g., residential, industrial, commercial; if mixed, specify types)
   ii. Is a cluster/conservation layout proposed? [ ] Yes [ ] No
   iii. Number of lots proposed?
   iv. Minimum and maximum proposed lot sizes? Minimum _______ Maximum _______

   e. Will proposed action be constructed in multiple phases? [ ] Yes [ ] No
   i. If No, anticipated period of construction:
   ii. If Yes:
      • Total number of phases anticipated
      • Anticipated commencement date of phase 1 (including demolition) month ______ year
      • Anticipated completion date of final phase month ______ year
      • Generally describe connections or relationships among phases, including any contingencies where progress of one phase may determine timing or duration of future phases:
f. Does the project include new residential uses?  
   - Yes  
   - No
   If Yes, show numbers of units proposed.
<table>
<thead>
<tr>
<th>Initial Phase</th>
<th>Two Family</th>
<th>Three Family</th>
<th>Multiple Family (four or more)</th>
</tr>
</thead>
<tbody>
<tr>
<td>At completion</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>of all phases</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

   g. Does the proposed action include new non-residential construction (including expansions)?  
   - Yes  
   - No
   If Yes, **See DEIS Section 2.2**
   1. Total number of structures
   2. Dimensions (in feet) of largest proposed structure: height; width; and length
   3. Approximate extent of building space to be heated or cooled: square feet

   h. Does the proposed action include construction or other activities that will result in the impoundment of any liquids, such as creation of a water supply, reservoir, pond, lake, waste lagoon or other storage?  
   - Yes  
   - No
   If Yes,
   1. Purpose of the impoundment:
   2. If a water impoundment, the principal source of the water:  
      - Ground water
      - Surface water streams
      - Other specify:
   3. If other than water, identify the type of impounded/contained liquids and their source.
      - Approximate size of the proposed impoundment. Volume: million gallons; surface area: acres
      - Dimensions of the proposed dam or impounding structure: height; length
      - Construction method/materials for the proposed dam or impounding structure (e.g., earth fill, rock, wood, concrete):

D.2. Project Operations

a. Does the proposed action include any excavation, mining, or dredging, during construction, operations, or both?  
   - Yes  
   - No
   (Not including general site preparation, grading or installation of utilities or foundations where all excavated materials will remain onsite)
   If Yes:
   1. What is the purpose of the excavation or dredging? **Installation of underground pipelines**
   2. How much material (including rock, earth, sediments, etc.) is proposed to be removed from the site?  
      - Volume (specify tons or cubic yards): None, roughly 90% of excavated material will be returned to trench as backfill. Remainder used for grading.
      - Over what duration of time? N/A
   3. Describe nature and characteristics of materials to be excavated or dredged, and plans to use, manage or dispose of them.  
      **See DEIS Sections 3.1.2 and 4.1.2**
   4. Will there be onsite dewatering or processing of excavated materials?  
      - Yes  
      - No
      If yes, describe. Where route passes through areas with saturated soils, spoils will be dewatered. See DEIS, page 2-30, Trenching.
      **See DEIS Table 2.2-3, pg 2-8** acres
   5. What is the total area to be dredged or excavated? **See DEIS Table 2.2-3, pg 2-8** acres
   6. What is the maximum area to be worked at any one time?  
      **See DEIS Table 2.2-3, pg 2-8** acres
   7. What would be the maximum depth of excavation or dredging?  
      **6 feet**
   8. Will the excavation require blasting?  
      - Yes  
      - No
   9. Summarize site reclamation goals and plan:

      Return surface conditions in work zone to pre-construction conditions (see DEIS pg 2-49, Final Cleanup and Stabilization)

b. Would the proposed action cause or result in alteration of, increase or decrease in size of, or encroachment into any existing wetland, waterbody, shoreline, beach or adjacent area?  
   - Yes  
   - No
   If Yes:
   1. Identify the wetland or waterbody which would be affected (by name, water index number, wetland map number or geographic description):  
      **See DEIS Section 4.1.3.2 (Surface Water Resources) and Section 4.1.8 (Wetlands), DEIS Appendix F and DEIS Appendix H.**
ii. Describe how the proposed action would affect that waterbody or wetland, e.g. excavation, fill, placement of structures, or alteration of channels, banks and shorelines. Indicate extent of activities, alterations and additions in square feet or acres: 

Varies, see DEIS Section 2.3.2.1, DEIS Section 4.1.8, DEIS Appendix F and DEIS Appendix H

iii. Will proposed action cause or result in disturbance to bottom sediments?

If Yes, describe: see DEIS Section 2.3.2.2, and DEIS Appendix F

iv. Will proposed action cause or result in the destruction or removal of aquatic vegetation?

If Yes:
- acres of aquatic vegetation proposed to be removed: precise acreage undetermined, see generally DEIS Section 4.1.6
- expected acreage of aquatic vegetation remaining after project completion: precise acreage undetermined, see generally DEIS Section 4.1.6
- purpose of proposed removal (e.g. beach clearing, invasive species control, boat access): incidental to construction
- proposed method of plant removal: excavation and dredging
- if chemical/herbicide treatment will be used, specify product(s): NA

v. Describe any proposed reclamation/mitigation following disturbance:

See DEIS Section 5.1.6

c. Will the proposed action use, or create a new demand for water?

If Yes: During construction only, See DEIS pg. 2-33 and 5-6 gallons/day

i. Total anticipated water usage/demand per day:

ii. Will the proposed action obtain water from an existing public water supply?

If Yes:
- Name of district or service area:
- Does the existing public water supply have capacity to serve the proposal?
- Is the project site in the existing district?
- Is expansion of the district needed?
- Do existing lines serve the project site?

iii. Will line extension within an existing district be necessary to supply the project?

If Yes:
- Describe extensions or capacity expansions proposed to serve this project:
- Source(s) of supply for the district:

iv. Is a new water supply district or service area proposed to be formed to serve the project site?

If Yes:
- Applicant/sponsor for new district:
- Date application submitted or anticipated:
- Proposed source(s) of supply for new district:

v. If a public water supply will not be used, describe plans to provide water supply for the project:

vi. If water supply will be from wells (public or private), maximum pumping capacity: gallons/minute.

d. Will the proposed action generate liquid wastes?

If Yes: During construction only, See DEIS pg. 2-33 and 5-6 gallons/day

i. Total anticipated liquid waste generation per day:

ii. Nature of liquid wastes to be generated (e.g., sanitary wastewater, industrial; if combination, describe all components and approximate volumes or proportions of each):

See DEIS pg. 5-6 - 5-7.

iii. Will the proposed action use any existing public wastewater treatment facilities?

If Yes:
- Name of wastewater treatment plant to be used:
- Name of district:
- Does the existing wastewater treatment plant have capacity to serve the project?
- Is the project site in the existing district?
- Is expansion of the district needed?

</table>
h. Will the proposed action generate or emit methane (including, but not limited to, sewage treatment plants, landfills, composting facilities)?
   - Yes  No

   If Yes:
   i. Estimate methane generation in tons/year (metric):
   ii. Describe any methane capture, control or elimination measures included in project design (e.g., combustion to generate heat or electricity, flaring):

i. Will the proposed action result in the release of air pollutants from open-air operations or processes, such as quarry or landfill operations?  During construction phase only.
   - Yes  No

   If Yes: Describe operations and nature of emissions (e.g., diesel exhaust, rock particulates/dust):
   See DEIS Section 4.1.4 for air impacts during construction

j. Will the proposed action result in a substantial increase in traffic above present levels or generate substantial new demand for transportation facilities or services?
   - Yes  No

   If Yes:
   i. When is the peak traffic expected (Check all that apply):  Morning  Evening  Weekend
      - Randomly between hours of ______ to ______
   ii. For commercial activities only, projected number of semi-trailer truck trips/day: ______
   iii. Parking spaces: Existing ______ Proposed ______ Net increase/decrease ______
   iv. Does the proposed action include any shared use parking?  - Yes  No
   v. If the proposed action includes any modification of existing roads, creation of new roads or change in existing access, describe:

vi. Are public/private transportation service(s) or facilities available within ½ mile of the proposed site?  - Yes  No
vii. Will the proposed action include access to public transportation or accommodations for use of hybrid, electric or other alternative fueled vehicles?  - Yes  No
viii. Will the proposed action include plans for pedestrian or bicycle accommodations for connections to existing pedestrian or bicycle routes?  - Yes  No

k. Will the proposed action (for commercial or industrial projects only) generate new or additional demand for energy?
   - Yes  No

   If Yes:
   i. Estimate annual electricity demand during operation of the proposed action:
      - 172 million KWhr per year
   ii. Anticipated sources/suppliers of electricity for the project (e.g., on-site combustion, on-site renewable, via grid/local utility, or other):
      - Existing power grid
   iii. Will the proposed action require a new, or an upgrade to, an existing substation?  - Yes  No

l. Hours of operation. Answer all items which apply.
   i. During Construction:  See DEIS Section 2.4
      - Monday - Friday:  7 AM - 7 PM
      - Saturday:  7 AM - 7 PM
      - Sunday:  None
      - Holidays:  None
   ii. During Operations:
      - Monday - Friday:  24 hrs
      - Saturday:  24 hrs
      - Sunday:  24 hrs
      - Holidays:  24 hrs
m. Will the proposed action produce noise that will exceed existing ambient noise levels during construction, operation, or both? [Yes] [No]
   If yes:
   i. Provide details including sources, time of day and duration:
      Noise impacts generally limited to construction, see DEIS Section 4.2.7
   ii. Will proposed action remove existing natural barriers that could act as a noise barrier or screen? [Yes] [No]
      Describe:

n. Will the proposed action have outdoor lighting? [At pump stations only.]
   [Yes] [No]
   If yes:
   i. Describe source(s), location(s), height of fixture(s), direction/aim, and proximity to nearest occupied structures:
      At pump stations only, as described in DEIS Section 2.2.2
   ii. Will proposed action remove existing natural barriers that could act as a light barrier or screen? [Yes] [No]
      Describe:

o. Does the proposed action have the potential to produce odors for more than one hour per day? [Yes] [No]
   If Yes, describe possible sources, potential frequency and duration of odor emissions, and proximity to nearest occupied structures:

p. Will the proposed action include any bulk storage of petroleum (combined capacity of over 1,100 gallons) or chemical products 185 gallons in above ground storage or any amount in underground storage? [Yes] [No]
   If Yes: Limited to construction period. See DEIS Section 4.1.3.2.5
   i. Product(s) to be stored
   ii. Volume(s) ____ per unit time ___ (e.g., month, year)
   iii. Generally describe proposed storage facilities:

q. Will the proposed action (commercial, industrial and recreational projects only) use pesticides (i.e., herbicides, insecticides) during construction or operation? [Yes] [No]
   If Yes:
   i. Describe proposed treatment(s):
   ii. Will the proposed action use Integrated Pest Management Practices? [Yes] [No]
   iii. Will the proposed action (commercial or industrial projects only) involve or require the management or disposal of solid waste (excluding hazardous materials)? During construction only. See DEIS Section 3.2.3.3.
   If Yes:
   i. Describe any solid waste(s) to be generated during construction or operation of the facility:
      • Construction: ____ tons per ____ (unit of time)
      • Operation: ____ tons per ____ (unit of time)
   ii. Describe any proposals for on-site minimization, recycling or reuse of materials to avoid disposal as solid waste:
      • Construction:
      • Operation:
   iii. Proposed disposal methods/facilities for solid waste generated on-site:
      • Construction:
      • Operation:
s. Does the proposed action include construction or modification of a solid waste management facility? □ Yes □ No

If Yes:

i. Type of management or handling of waste proposed for the site (e.g., recycling or transfer station, composting, landfill, or other disposal activities):

ii. Anticipated rate of disposal/processing:

- Tons/month, if transfer or other non-combustion/thermal treatment, or
- Tons/hour, if combustion or thermal treatment

iii. If landfill, anticipated site life: __________ years

E. Site and Setting of Proposed Action

E.1. Land uses on and surrounding the project site

a. Existing land uses.

i. Check all uses that occur on, adjoining and near the project site.

☑️ Urban ☑️ Industrial ☑️ Commercial ☑️ Residential (suburban) ☑️ Rural (non-farm)

☑️ Forest ☑️ Agriculture ☑️ Aquatic ☑️ Other (specify): transportation

ii. If mix of uses, generally describe:

See DEIS Section 3.2.2

b. Land uses and covertypes on the project site.

<tr>
<td>• Volume impounded: gallons OR acre-feet</td>
<td></td>
</tr>
<tr>
<td>ii. Dam's existing hazard classification:</td>
<td></td>
</tr>
<tr>
<td>iii. Provide date and summarize results of last inspection:</td>
<td></td>
</tr>
<tr>
<td>f. Has the project site ever been used as a municipal, commercial or industrial solid waste management facility, or does the project site adjoin property which is now, or was at one time, used as a solid waste management facility?</td>
<td>☑ Yes ☐ No</td>
</tr>
<tr>
<td>If Yes: i. Has the facility been formally closed?</td>
<td>☑ Yes ☐ No</td>
</tr>
<tr>
<td>• If yes, cite sources/documentation:</td>
<td></td>
</tr>
<tr>
<td>ii. Describe the location of the project site relative to the boundaries of the solid waste management facility:</td>
<td></td>
</tr>
<tr>
<td>iii. Describe any development constraints due to the prior solid waste activities:</td>
<td></td>
</tr>
<tr>
<td>g. Have hazardous wastes been generated, treated and/or disposed of at the site, or does the project site adjoin property which is now or was at one time used to commercially treat, store and/or dispose of hazardous waste?</td>
<td>☑ Yes ☐ No</td>
</tr>
<tr>
<td>If Yes: i. Describe waste(s) handled and waste management activities, including approximate time when activities occurred:</td>
<td></td>
</tr>
<tr>
<td>h. Potential contamination history. Has there been a reported spill at the proposed project site, or have any remedial actions been conducted at or adjacent to the proposed site?</td>
<td>☑ Yes ☐ No</td>
</tr>
<tr>
<td>See Section 3.1.2.8</td>
<td></td>
</tr>
<tr>
<td>If Yes: i. Is any portion of the site listed on the NYSDEC Spills Incidents database or Environmental Site Remediation database? Check all that apply:</td>
<td>☑ Yes ☐ No</td>

<tr>
<td>• Yes – Spills Incidents database Provide DEC ID number(s):</td>
<td></td>
</tr>
<tr>
<td>• Yes – Environmental Site Remediation database</td>
<td></td>
</tr>
<tr>
<td>• Neither database</td>
<td></td>
</tr>
<tr>
<td>ii. If site has been subject of RCRA corrective activities, describe control measures:</td>
<td></td>
</tr>
<tr>
<td>iii. Is the project within 2000 feet of any site in the NYSDEC Environmental Site Remediation database?</td>
<td>☑ Yes ☐ No</td>
</tr>
<tr>
<td>If yes, provide DEC ID number(s):</td>
<td></td>
</tr>
<tr>
<td>iv. If yes to (i), (ii) or (iii) above, describe current status of site(s):</td>
<td></td>
</tr>
<tr>
<td>v. Is the project site subject to an institutional control limiting property uses?</td>
<td>Yes ☐ No ☑</td>
</tr>
<tr>
<td>---</td>
<td>---</td>
</tr>
<tr>
<td>• If yes, DEC site ID number:</td>
<td></td>
</tr>
<tr>
<td>• Describe the type of institutional control (e.g., deed restriction or easement):</td>
<td></td>
</tr>
<tr>
<td>• Describe any use limitations:</td>
<td></td>
</tr>
<tr>
<td>• Describe any engineering controls:</td>
<td></td>
</tr>
<tr>
<td>• Will the project affect the institutional or engineering controls in place?</td>
<td>Yes ☐ No ☑</td>
</tr>
<tr>
<td>Explain:</td>
<td></td>
</tr>
</tbody>
</table>

**E.2. Natural Resources On or Near Project Site**

a. What is the average depth to bedrock on the project site? **Varies, see DEIS Section 3.1.1**

b. Are there bedrock outcroppings on the project site? **Yes ☐ No ☑**

<table>
<thead>
<tr>
<th>If Yes, what proportion of the site is comprised of bedrock outcroppings? <strong>Table 3.1.1-1</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>%</td>
</tr>
<tr>
<td>%</td>
</tr>
<tr>
<td>%</td>
</tr>
</tbody>
</table>

c. Predominant soil type(s) present on project site: **Varies, see DEIS Section 3.1.2**

d. What is the average depth to the water table on the project site? **Average: Varies, see DEIS Section 3.1.3.1**

e. Drainage status of project site soils: **Well Drained:** % of site **Varies, See DEIS Section 3.1.2 and Section 3.2.2.4**

| Moderately Well Drained: % of site |
| Poorly Drained: % of site |

f. Approximate proportion of proposed action site with slopes: **0-10%:** % of site **Varies, see DEIS Section 3.1.1.3**

| 10-15%: % of site |
| 15% or greater: % of site |

g. Are there any unique geologic features on the project site? **Yes ☐ No ☑**

| If Yes, describe: **See DEIS Section 3.1.1.4** |

h. Surface water features.

i. Does any portion of the project site contain wetlands or other waterbodies (including streams, rivers, ponds or lakes)? **Yes ☐ No ☑**

| If No, skip to E.2.i. |

j. Do any wetlands or other waterbodies adjoin the project site? **Yes ☐ No ☑**

| If No, skip to E.2.1. |

ii. Are any of the wetlands or waterbodies within or adjoining the project site regulated by any federal, state or local agency? **Yes ☐ No ☑**

| If No, skip to E.2.i. |

iv. For each identified regulated wetland and waterbody on the project site, provide the following information:

| Streams: Name **See DEIS Section 3.1.3.2, and DEIS Appendix F** Classification |
| Lakes or Ponds: Name **See DEIS Section 3.1.3.2, and DEIS Appendix F** Classification |
| Wetlands: Name **See DEIS Section 3.1.8, and DEIS Appendix H** Approximate Size |
| Wetland No. (if regulated by DEC) **See DEIS Section 3.1.8, and DEIS Appendix H** |

v. Are any of the above water bodies listed in the most recent compilation of NYS water quality-impaired waterbodies? **Yes ☐ No ☑**

| If yes, name of impaired water body/bodies and basis for listing as impaired: **See DEIS Appendix F, Table F-2** |

i. Is the project site in a designated Floodway? **Yes ☐ No ☑**

| j. Is the project site in the 100 year Floodplain? **Yes ☐ No ☑** |

| k. Is the project site in the 500 year Floodplain? **Yes ☐ No ☑** |

l. Is the project site located over, or immediately adjoining, a primary, principal or sole source aquifer? **Yes ☐ No ☑**

| If Yes: |
| Name of aquifer: **See DEIS Section 3.1.3.1.2** |
m. Identify the predominant wildlife species that occupy or use the project site:

See DEIS Section 3.1.5.2

n. Does the project site contain a designated significant natural community? [ ] Yes [ ] No

If Yes:

i. Describe the habitat/community (composition, function, and basis for designation):

See DEIS Section 3.1.5.1

ii. Source(s) of description or evaluation: See DEIS Section 3.1.5.1

iii. Extent of community/habitat:

- Currently: ___________ acres
- Following completion of project as proposed: ___________ acres
- Gain or loss (indicate + or -): ___________ acres

See DEIS Section 3.1.5.1

o. Does project site contain any species of plant or animal that is listed by the federal government or NYS as endangered or threatened, or does it contain any areas identified as habitat for an endangered or threatened species? [ ] Yes [ ] No

See DEIS Section 3.1.7

p. Does the project site contain any species of plant or animal that is listed by NYS as rare, or as a species of special concern? [ ] Yes [ ] No

See DEIS Section 3.1.7

q. Is the project site or adjoining area currently used for hunting, trapping, fishing or shell fishing? [ ] Yes [ ] No

If yes, give a brief description of how the proposed action may affect that use:

No significant negative impacts

E.3. Designated Public Resources On or Near Project Site

a. Is the project site, or any portion of it, located in a designated agricultural district certified pursuant to Agriculture and Markets Law, Article 25-AA, Section 303 and 304? [ ] Yes [ ] No

If Yes, provide county plus district name/number: See DEIS Section 3.2.2.4

b. Are agricultural lands consisting of highly productive soils present? [ ] Yes [ ] No

i. If Yes: acreage(s) on project site? See DEIS Section 3.2.2.4

ii. Source(s) of soil rating(s):

c. Does the project site contain all or part of, or is it substantially contiguous to, a registered National Natural Landmark? [ ] Yes [ ] No

If Yes:

i. Nature of the natural landmark: □ Biological Community □ Geological Feature

ii. Provide brief description of landmark, including values behind designation and approximate size/extent:

d. Is the project site located in or does it adjoin a state listed Critical Environmental Area? [ ] Yes [ ] No

If Yes:

i. CEA name:

ii. Basis for designation:

iii. Designating agency and date:
e. Does the project site contain, or is it substantially contiguous to, a building, archaeological site, or district which is listed on, or has been nominated by the NYS Board of Historic Preservation for inclusion on, the State or National Register of Historic Places?  
  Yes [ ] No [ ]

If Yes:
  i. Nature of historic/archaeological resource: [ ] Archaeological Site  [ ] Historic Building or District
  ii. Name: See DEIS Section 3.2.5
  iii. Brief description of attributes on which listing is based:

See DEIS Section 3.2.5

f. Is the project site, or any portion of it, located in or adjacent to an area designated as sensitive for archaeological sites on the NY State Historic Preservation Office (SHPO) archaeological site inventory?  
  Yes [ ] No [ ]

See DEIS Section 3.2.5

G. Have additional archaeological or historic site(s) or resources been identified on the project site?  
  Yes [ ] No [ ]

If Yes:
  i. Describe possible resource(s): See DEIS Section 3.2.5.2, 3.2.5.3
  ii. Basis for identification:

See DEIS Section 3.2.5

h. Is the project site within five miles of any officially designated and publicly accessible federal, state, or local scenic or aesthetic resource?  
  Yes [ ] No [ ]

If Yes:
  i. Identify resource:
  ii. Nature of, or basis for, designation (e.g., established highway overlook, state or local park, state historic trail or scenic byway, etc.):
  iii. Distance between project and resource: miles.

i. Is the project site located within a designated river corridor under the Wild, Scenic and Recreational Rivers Program 6 NYCRR 666?  
  Yes [ ] No [ ]

If Yes:
  i. Identify the name of the river and its designation:
  ii. Is the activity consistent with development restrictions contained in 6NYCRR Part 666?  
    Yes [ ] No [ ]

F. Additional Information

Attach any additional information which may be needed to clarify your project.

If you have identified any adverse impacts which could be associated with your proposal, please describe those impacts plus any measures which you propose to avoid or minimize them.

G. Verification

I certify that the information provided is true to the best of my knowledge.

Applicant/Sponsor Name: PILGRIM TRANSPORTATION OF NEW YORK, INC  Date: JUNE 27, 2016

Signature:  ERROL BOYLE  Title: PRESIDENT
Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency’s reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency and the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:
- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer “Yes” to a numbered question, please complete all the questions that follow in that section.
- If you answer “No” to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box “Moderate to large impact may occur.”
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the “whole action”.
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

e. The proposed action may diminish the capacity of a registered National Natural Landmark to support the biological community it was established to protect.

f. The proposed action may result in the removal of, or ground disturbance in, any portion of a designated significant natural community.
   Source: Applicant Prepared DEIS dated August 2015

   The proposed action may substantially interfere with nesting/breeding, foraging, or over-wintering habitat for the predominant species that occupy or use the project site.

h. The proposed action requires the conversion of more than 10 acres of forest, grassland or any other regionally or locally important habitat.
   Habitat type & information source:
   Applicant Prepared DEIS dated August 2015

i. Proposed action (commercial, industrial or recreational projects, only) involves use of herbicides or pesticides.

j. Other impacts: 

8. Impact on Agricultural Resources
   The proposed action may impact agricultural resources. (See Part 1. E.3.a. and b.)
   If “Yes”, answer questions a - h. If “No”, move on to Section 9.

   Relevant Part I Question(s) | No, or small impact may occur | Moderate to large impact may occur
---|---|---
a. The proposed action may impact soil classified within soil group 1 through 4 of the NYS Land Classification System. | E2c, E3b | ✘
b. The proposed action may sever, cross or otherwise limit access to agricultural land (includes cropland, hayfields, pasture, vineyard, orchard, etc). | E1a, E1b | ✘
c. The proposed action may result in the excavation or compaction of the soil profile of active agricultural land. | E3b | ✘
d. The proposed action may irreversibly convert agricultural land to non-agricultural uses, either more than 2.5 acres if located in an Agricultural District, or more than 10 acres if not within an Agricultural District. | E1b, E3a | ✘
e. The proposed action may disrupt or prevent installation of an agricultural land management system. | E1a, E1b | ✘
f. The proposed action may result, directly or indirectly, in increased development potential or pressure on farmland. | C2c, C3, D2c, D2d | ✔
g. The proposed project is not consistent with the adopted municipal Farmland Protection Plan. | C2c | ✔
h. Other impacts: 

   Applicant Prepared DEIS dated August 2015
9. **Impact on Aesthetic Resources**

The land use of the proposed action are obviously different from, or are in sharp contrast to, current land use patterns between the proposed project and a scenic or aesthetic resource. (Part 1. E.1.a, E.1.b, E.3.h.)

*If “Yes”, answer questions a - g. If “No”, go to Section 10.*

**Full Environmental Assessment Form**

**Part 3 - Evaluation of the Magnitude and Importance of Project Impacts and Determination of Significance**

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

**Reasons Supporting This Determination:**

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact.
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

Refer to narrative, "Full Environmental Assessment Form, Supplement to Part 3 - Evaluation of the Magnitude and Importance of Project Impacts and Determination of Significance, POSITIVE DECLARATION" for Pilgrim Pipeline dated September 14, 2016.

Upon review of the information recorded on this EAF, as noted, plus this additional support information
Applicant prepared DEIS dated August 2015 was reviewed in lieu of Part 1 of an EAF.

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the NYS Dept. of Environmental Conservation and the NYS Thruway Authority as lead agency that:

☐ A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

☐ B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.d).

☑ C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.

Name of Action: Pilgrim Pipeline Project

Name of Lead Agency: NYS Dept. of Environmental Conservation / NYS Thruway Authority

Name of Responsible Officer in Lead Agency: Karen M. Galdasz / Catherine T. Sheridan, P.E.,

Title of Responsible Officer: Environmental Analyst 2 / Chief Engineer

Signature of Responsible Officer in Lead Agency: [Signature] Date: 9/14/16

Signature of Preparer (if different from Responsible Officer): [Signature] Date:

For Further Information:

Contact Person: Karen M. Galdasz / Elizabeth K. Nova
Address: 625 Broadway, 4th Floor, Albany, NY 12233 / NYSTA, 200 Southern Blvd, PO Box 189, Albany, NY 12201-0189
Telephone Number: 518-402-9167 / 518-471-5300
E-mail: pilgrim pipeline@dec.ny.gov or pilgrim pipeline@thruway.ny.gov

For Type 1 Actions and Conditioned Negative Declarations, a copy of this Notice is sent to:

Chief Executive Officer of the political subdivision in which the action will be principally located (e.g., Town / City / Village of)
Other involved agencies (if any)
Applicant (if any)
NEW YORK STATE DEPARTMENT OF STATE
COASTAL MANAGEMENT PROGRAM

Coastal Assessment Form

A. INSTRUCTIONS (Please print or type all answers)

1. State agencies shall complete this CAF for proposed actions which are subject to Part 600 of Title 19 of the NYCRR. This assessment is intended to supplement other information used by a state agency in making a determination of significance pursuant to the State Environmental Quality Review Act (see 6 NYCRR, Part 617). If it is determined that a proposed action will not have a significant effect on the environment, this assessment is intended to assist a state agency in complying with the certification requirements of 19 NYCRR Section 600.4.

2. If any question in Section C on this form is answered “yes”, then the proposed action may affect the achievement of the coastal policies contained in Article 42 of the Executive Law. Thus, the action should be analyzed in more detail and, if necessary, modified prior to either (a) making a certification of consistency pursuant to 19 NYCRR Part 600 or, (b) making the findings required under SEQR, 6 NYCRR, Section 617.11, if the action is one for which an environmental impact statement is being prepared. If an action cannot be certified as consistent with coastal policies, it shall not be undertaken.

3. Before answering the questions in Section C, the preparer of this form should review the coastal policies contained in 19 NYCRR Section 600.5. A proposed action should be evaluated as to its significant beneficial and adverse effects upon the coastal area.

B. DESCRIPTION OF PROPOSED ACTION

1. Type of state agency action (check appropriate response):
   (a) Directly undertaken (e.g. capital construction, planning activity, agency regulation, land transaction) ___
   (b) Financial assistance (e.g. grant, loan subsidy) ___
   (c) Permit, license, certification X

2. Describe nature and extent of action: Pilgrim Pipeline Project, 116.4 mile parallel pipelines from Albany, NY to NY Border. (pipelines will ultimately go to Linden, NJ)

3. Location of action: Refer to attached map

   Multiple ___  Multiple ___  Multiple ___

   County City Town or Village Street or Site Description

4. If an application for the proposed action has been filed with the state agency, the following information shall be provided:
   (a) Name of applicant: Pilgrim Transportation of New York, Inc.
   (b) Mailing address: 220 Albany Ave, 1039 Suite 315, Canton, CT 06019
   (c) Telephone Number: Area Code (860) 693-6967
   (d) State agency application number: N/A

5. Will the action be directly undertaken, require funding, or approval by a federal agency?
   Yes X No ___ If yes, which federal agency? US Army Corps of Engineers, FWHA ___

C. COASTAL ASSESSMENT (Check either “YES” or “NO” for each of the following questions)

1. Will the proposed activity be located in, or contiguous to, or have a significant effect upon any of the resource areas identified on the coastal area map:
   (a) Significant fish or wildlife habitats? X ___
   (b) Scenic resources of statewide significance? X ___
   (c) Important agricultural lands? X ___

2. Will the proposed activity have a significant effect upon:
   (a) Commercial or recreational use of fish and wildlife resources? X ___
   (b) Scenic quality of the coastal environment? X ___
   (c) Development of future, or existing water dependent uses? X ___
   (d) Operation of the State’s major ports? X ___
   (e) Land and water uses within the State’s small harbors? X ___
   (f) Existing or potential public recreation opportunities? X ___
   (g) Structures, sites or districts of historic, archeological or cultural significance to the State or nation? X ___
3. Will the proposed activity involve or result in any of the following: 

(a) Physical alteration of two (2) acres or more of land along the shoreline, land under water or coastal waters?  
(b) Physical alteration of five (5) acres or more of land located elsewhere in the coastal area?  
(c) Expansion of existing public services of infrastructure in undeveloped or low density areas of the coastal area?  
(d) Energy facility not subject to Article VII or VIII of the Public Service Law?  
(e) Mining, excavation, filling or dredging in coastal waters?  
(f) Reduction of existing or potential public access to or along the shore?  
(g) Sale or change in use of state-owned lands located on the shoreline or under water?  
(h) Development within a designated flood or erosion hazard area?  
(i) Development on a beach, dune, barrier island or other natural feature that provides protection against flooding or erosion?  

4. Will the proposed action be located in or have a significant effect upon an area included in an approved Local Waterfront Revitalization Program?  

D. SUBMISSION REQUIREMENTS  

If any question in Section C is answered “Yes”, AND either of the following two conditions is met:  

Section B.1(a) or B.1(b) is checked; or  
Section B.1(c) is checked AND B.5 is answered “Yes”.  

THEN a copy of this completed Coastal Assessment Form shall be submitted to:  

New York State Department of State  
Office of Coastal, Local Government and Community Sustainability  
One Commerce Plaza  
99 Washington Avenue, Suite 1010  
Albany, New York 12231-0001  

If assistance or further information is needed to complete this form, please call the Department of State at (518) 474-6000.  

E. REMARKS OR ADDITIONAL INFORMATION  

According to Pilgrim Transportation of New York, Inc., the Pilgrim Pipeline will traverse 3 Local Waterfront Revitalization Programs and 9.55 miles of Coastal Zone, outside of the LWRPs.  
LWRP’s includes:  
City of Albany LWRP – 1.1 miles  
City of Rensselaer LWRP – 1.22 miles  
City of Newburgh LWRP – 0.22 miles  

Preparer’s Name: Karen M Gaidasz
